SpeedFace-V5L

SpeedFace-V5L[TD]

SpeedFace-V5L[TI]

The SpeedFace-V5L Series employs intelligent engineering facial recognition algorithms and cutting-edge computer vision technology. It offers support for fingerprint, facial, and palm verification with large capacity and speedy recognition. Moreover, the SpeedFace-V5L is equipped with QR code support via Mobile APP, further enhancing the device's security performance in all aspects.

**SpeedFace-V5L Series** uses touchless recognition technology and can identify individuals even when wearing masks, making it a hygienic option. Additionally, it has an advanced anti-spoofing algorithm that can detect fake photos and videos. It also features 3-in-1 palm recognition, which can identify Palm Shape, Palm Print, and Palm Vein in just 0.35 seconds per hand. The palm data is then compared to a maximum of 3,000 palm templates. The facial camera also supports QR codes, Data Matrix, MicroAztec, and other formats, and the ZKBioAccess IVS Mobile APP supports Dynamic QR codes for T&A/A&C.

The TD/TI Version with mask detection helps reduce the spread of germs and help prevent infections straightly. At each access point of any premises and public areas such as hospitals, factories, schools, commercial buildings, and stations during the recent global public health issue with its masked individual identification function during facial and palm verification.

**SpeedFace-V5L Series** supports video intercom via the mobile app ZSmart and PC software ZKBioTalk. Also, they are integrated with ONVIF Video protocol to connect to ONVIF NVR for Video surveillance and recording. Moreover, it is compatible with ZKBio Zlink Mobile APP & ZKBio Zlink-Web when switching to BEST protocol. It also supports SIP Protocol connection to the indoor unit.
