

# Video Modem System

VDS-2100 Series

VDS 2100-R sender  
(Remote Unit - RU)

VDS 2200-L viewer  
(Local Unit - LU)

The VDS transmission system transmits real-time video, audio signal and feeds DC power to CCD camera only through one coaxial cable. This feature enables to install and use in all kinds of indoor circumstance.

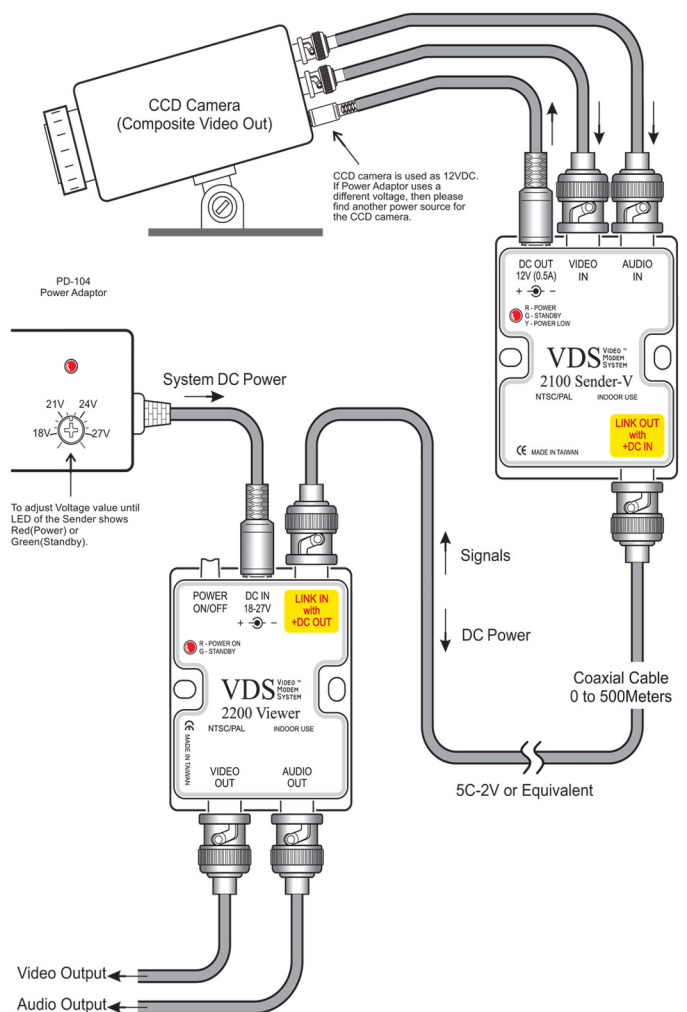

## Advantages

- ◆ Completely transmits picture and sound in real-time, using one coaxial cable
- ◆ Transmitting AV signals over long distance easily
- ◆ Rugged and compact size
- ◆ Easy to install and easy to use

## Features

- ◆ Sufficient and stable DC Current out (0.4A)
- ◆ Adjustable DC voltage input
- ◆ Light weight and small size
- ◆ High efficiency
