Perfect communication
between form and materials

InfinitePlay entrance panels are designed to withstand vandalism, heavy rain and the worst weather. The front cover is made from **AISI 316 Scotch Brite brushed stainless steel** to resist even the most aggressive atmospheres. **Glass parts are made from** ultra-strong, scratch-proof glass.

Wide Display

4,3" sun-readable.

MIC

noise cancellation

PoE

Power over ethernet

Security

Anti-theft fixing.

Designed &
Made in Italy

Flat

Versatility

Two types of keypad are available, both with no moving parts.

Z2001 with illuminated name buttons for 1 to 4 user systems.

Z200D with touch-screen for scrolling name searches and for displaying additional information like the floor and staircase number of offices. Thanks to touch-screen technology, there are no limits to the number of internal users.

Comfort

The generous **4.3" sun-readable display** allows users to communicate with visitors via images and status messages (e.g. "calling", "talking", "door opening", "call ended").

You can also record an **automatic answer** on your video door phone to display to visitors at the entrance panel. This is an extremely useful function for shops and offices wishing to display their opening days/times.

The microphone uses **noise cancelling** technology to eliminate background noise from busy roads.

The touch-screen display also provides a numeric keypad for opening doors by entering a pre-programmed code. Doors can also be opened via **InfinitePlay** app on your smartphone.
